---

### **Professional Experience**

Peter has spent over seven years with the Queensland Department of Main Roads in various roles including Soils Laboratory Supervisor, Construction Technician and Project Manger for the commercialised business units. During this time he was based in Emerald but worked on projects located throughout Western Queensland including Barcaldine and Winton.

Prior to this, Peter was a Soil Tester with CQ Tec Services Pty Ltd in Rockhampton for three years and gained valuable exposure to many different civil construction projects.

Peter has recently commenced with Graham Scott and Associates Pty Ltd as a Civil Technician.

*10 February 2005 to date*

**Civil Technician**  
**Graham Scott & Associates Pty Ltd**

---

*January 2003 – January 2005*

**Project Manager (Technical)  
RoadTek (Asset Services) North  
Department of Main Roads  
Emerald**

As the Project Manager (Technical), Peter was responsible for the estimating and tendering of works for the Emerald and Barcaldine branches. He was also responsible for the project management of the delivery of maintenance, construction and minor works contracts. This involved monitoring projects against the 9 functions of Project Management as well as providing specific technical knowledge and advice to staff during design and construction stages of projects.

Significant projects include:

- Rail Overpass Construction – Bauhinia Regional Rail Project (Abigroup)
- East of Dingo – Widening and upgrading of 11km of the Capricorn Highway
- Miclere Ck – Earthworks for Timber Bridge Widening (sidetrack and approaches)
- Railway Ck and Toogood Ck – Repairs to bridge approaches including coring and back-filling of the relieving slabs
- Guardrail Installations and Upgrades – Various Sites in the Central Highlands District
- Flood Damage Repairs – Dawson River and Wawoon Creek, Capricorn Hwy

*August 1999 - January 2003*

**Construction Technician  
RoadTek (Asset Services) North  
Department of Main Roads  
Emerald**

During his time as a Construction Technician, Peter was used in various roles both onsite and in an office environment. Onsite these roles were Contractor's Quality Representative and Site Supervisor. This involved the day to day running of the work sites including daily costing materials usage, site setout and subcontractor coordination. In the office environment the roles included Estimator and Assistant Project Manger. Peter was responsible for reviewing incoming tender documents and drawings, generating tender documents for suppliers and subcontractors, and reviewing project costing and performance.
